----- END TRANSMISSION -----

These are player-vs-GM scenarios for *BattleTech: Outworlds Wastes* with combined arms and simplified campaign logistics rules.

Each player may bring 2,000 BV of 'Mechs from a single faction in the Late Succession War - LosTech era on the Master Unit List, following the *BattleTech: Outworlds Wastes* event list building rules. The list should have at least 2 'Mechs, one of which is piloted by your force commander.

After the first scenario, you may add up to 1,500 BV of units to your force. You must have at least one infantry unit and one unit capable of carrying infantry.

The enemy force uses the full *BattleTech: Outworlds Wastes* Force Maintenance rules for repair between scenarios.

The following optional rules are recommended:

- Initiative Deck: Initiative is determined by playing cards.
  - Each player receives one card; their whole force activates together.
  - The Movement Phase is resolved from lowest value to highest.
  - The Attack Phases are resolved from highest value to lowest.
- Fire for Effect: Attack declaration and resolution occur simultaneously.
- Low Gravity: Divide default MPs by 0.86 and round to compute the unit's new MPs.
